

ANTI-PHISHING AWARENESS

Cyber Security training service designed to increase staff preparedness against cyber threats.

Through an exercise with increasing levels of difficulty, you will be able to find out if your employees and collaborators are able to recognize a cyber attack, generating useful reports to improve internal security.

The service also includes a complete e-learning course, with unlimited access to interactive modules, quizzes, and final certification.

CORPORATE SECURITY LEVEL

1. CYBER RISK INVESTIGATION

CRI CYBER RISK INVESTIGATION

Cyber Risk Investigation is the service that helps companies identify, monitor, and mitigate cyber risks through non-invasive tests on infrastructure and data:

- **OSINT:** publicly accessible information, social media, and exposed documents;
- **Deep Web:** content not indexed by search engines or cloud archives without adequate protection;
- **Dark Web:** illegal markets, where the buying and selling of stolen data and tools for cyber attacks take place.

We are able to provide you with a Report in a very short time – COMPLIANT WITH OWASP/ISO 27001/NIS2/GDPR

2. SYSTEM WEAKNESSES ASSESSMENT

EVA VULNERABILITÀ ASSESSMENT

EVA's surface analysis examines corporate networks, services, and systems.

Thanks to AI, it allows for finding and resolving IT system vulnerabilities with effectiveness and time savings.

IT Analysis on infrastructures:

- URL;
- Server;
- Network;
- Corporate PCs.

EVA's Penetration Testing, based on proprietary code, detects and exploits known vulnerabilities (CVE) using OSSTMM / OWASP checklist methodology.

3. PROTECTION SYSTEM

V-PROTECT SECURE PERIMETER

vProtect is the cloud application for cyber security based on Acronis technology, featuring next-generation anti-malware protection based on AI for endpoint defense and monitoring.

vProtect offers a comprehensive solution that guarantees business continuity, maximum cyber protection, and operational efficiency, reducing the impact on IT resources and preventing interruptions and economic damage.
